Product Description

Submerged water grade Vietnam Nha Trang 4a natural agarwood sticks for smoking health agarwood log tobacco sticks agarw

It is instantly felt on the tip of the nose, with a sweet nectar fragrance at room temperature. When you hit it, the unique sweet and soft feeling makes people feel very warm. Through the beads is the process of awakening one's nature. After the erosion of the years, the world has become dull.

The agarwood grown in Yuzhuang submerged in water and cut into shredded pieces. Because about 5% of the shredded pieces are not submerged in water, they can be smoked and boiled in water. Brewed in wine, sachet material, rich in nectar and sweet aroma.

Instructions for use

1: Aromatherapy

Use an electronic incense burner to incense. The dosage is about 0.5 grams each time. Discard the material when it turns into black carbon.

2: Make tea

Use about 0.1 grams each time. After washing with boiling water, put it into a teapot and brew it directly. If you feel that the agarwood aroma is lighter, pour it out. After drying, you can use it for incense.

3: Soak in wine

After washing with boiling water, according to the ratio of one kilogram of white wine to one gram of fragrant materials (it can be increased or decreased appropriately according to the oil content of the fragrant materials), place it in the wine and seal it, and let it sit for 3-5 months before opening and drinking.
