Product Description

Green Qinan Stickless Powder Line Fragrance, as the name suggests, is made from 100% pure natural agarwood powder, without adding any sticky powder or water, and carefully crafted using a unique high-pressure pressing process. Compared with the common sticky powder incense on the market, the non sticky powder incense of Green Qinan is purer and more natural, which can maximize the preservation of the original aroma and medicinal value of agarwood. Meanwhile, due to the absence of artificial additives, it is safer and more environmentally friendly to use, allowing you to enjoy the fragrance while also taking care of your health.

1, The characteristics of the non stick pink line fragrance of Green Qinan:

Pure Material Selection: Green Qinan Non stick Pink Thread Fragrance is made from high-quality agarwood, which has been rigorously screened and finely processed. This type of agarwood is hard and rich in oil components, and when burned, it can release a rich and long-lasting aroma.

Unique process: High pressure compression molding technology is used to tightly bond agarwood powder together to form a linear structure, without the need to add any adhesives or moisture to maintain shape stability. This production method not only preserves the original flavor characteristics of agarwood, but also avoids the problem of harmful substance residues that may occur during the traditional incense making process.

Natural and harmless: No chemical synthetic substances or artificial pigments are used in the entire production process, ensuring the naturalness and safety of the product. This is particularly suitable for people with sensitive skin or allergies to certain chemicals.

Multi functional use: In addition to being used as a daily incense burner, it can also be used for various occasions such as yoga meditation, reading in the study, and tea ceremony performances to create a peaceful and comfortable atmosphere; It is also a great gift choice, suitable for expressing feelings to family and friends.

2, The efficacy and function of the non stick pink thread fragrance of Green Qinan:

Relieve stress: Modern people's fast-paced lifestyle and high work pressure can easily lead to anxiety. Igniting a green and non stick pink thread fragrance can help people quickly enter a relaxed state and reduce mental burden.

Improving sleep: Good sleep quality is crucial for maintaining human health, but in real life, many people suffer from insomnia and have difficulty falling asleep. At this time, you can try lighting a string of incense about half an hour before bedtime to slowly release it, which can help promote sleep and improve sleep quality.

Adjusting your mood: When you feel restless and agitated when encountering unpleasant things, you can adjust your mentality by smelling incense to become more calm and able to cope with the challenges in life.

Enhancing immunity: Long term adherence to the use of Green Qinan non stick powder thread fragrance can also help improve the body's resistance and reduce the risk of illness, resulting in a better physical condition.

3, How to use Green Qinan Non stick Pink Thread Fragrance correctly:

Choose a well ventilated and relatively quiet environment to place prepared tools such as incense sticks, lighters, etc;

Take out a intact incense stick from the packaging box and insert it vertically into the dedicated incense holder;

Light the bottom of the incense stick with a match or lighter until a clear flame appears, then gently blow it out to let it burn naturally;

Please pay attention to maintaining appropriate indoor humidity and avoiding strong winds during use to avoid affecting the fragrance diffusion effect;

After use, remember to handle the remaining parts properly and do not discard them casually to avoid environmental pollution and waste of resources.
