## Product Description

### Hainan Green Qinan Agarwood Pill Bead Hand String

#### Appearance features

##### Bead shape

The beads of this bracelet have a unique pill shape, flat and with a hole in the middle. From the picture, it can be clearly seen that each bead is like a small pill, which is relatively rare in bracelets and has a unique shape.

##### Material color

The bracelet is made of Hainan Green Qinan agarwood, and the beads exhibit the unique dark brown or light brown texture of agarwood. The color of agarwood will gradually change over time and wear, becoming more moist.

#### 2, Material characteristics

##### The source of agarwood

Agarwood is a precious type of wood that originates from trees in the agarwood genus of the Rosaceae family. When these trees are injured or infected by fungi, they secrete a type of resin to protect themselves, which accumulates and changes over a long period of time to form agarwood.

##### Aroma Characters

Agarwood has a unique aroma, which is elegant and long-lasting. When wearing agarwood pill bead bracelets, with the swing of the wrist, a faint agarwood fragrance will be emitted, giving people a peaceful and comfortable feeling.

### 3, Wearing experience

#### Comfort level

Due to the flat pill shape of the beads, when worn on the wrist, the bracelet fits snugly against the skin and does not have the rolling sensation of round bead bracelets, increasing the comfort of wearing.

#### Cultural connotation

Agarwood holds an important position in many cultures and is often associated with Zen and meditation. Wearing agarwood pill bead bracelets is not only a decoration, but also a continuation of traditional culture and a pursuit of inner peace.

#### 4, Maintenance methods

Avoid contact with chemicals

The agarwood hand string should not be exposed to chemicals such as perfume and detergent, so as not to affect its fragrance and material.

Regularly wipe

You can regularly wipe the bracelet with a clean soft cloth to keep its surface clean and shiny.

Storage environment

When not wearing, the bracelet should be stored in a dry, cool place, away from direct sunlight and high temperature environments.

In short, agarwood pill bead bracelets not only have a unique appearance and precious materials, but also bring physical and mental pleasure and cultural influence.
